Who we are

Socicom Ltd. is a newly-formed company founded in the early 2013. Despite our company's young age, we are a group of professional engineers and managers who have had various experiences working with Japanese and European companies, from big-sized corporations to small-and-medium firms since 2007.

Our main services are:

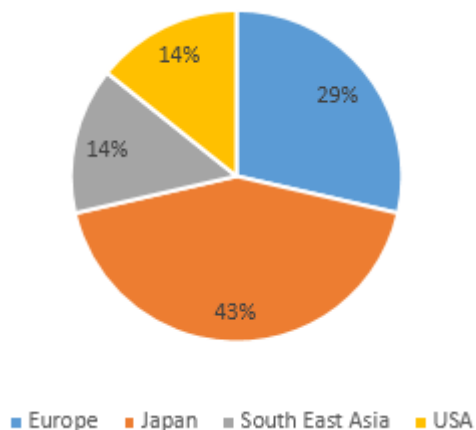

- Document processing: digitalization, data entry...
- Image retouch: background removal, retouch for e-commerce compatibility
- Dedicated personnel: we provide qualified staffs for your temporary human resource needs.

With our customer insights and expertise in many phases of business process, we know how to help SMEs benefit the fair advantage of economies of scale. Through our system, you will have opportunities to save largely your fixed cost along your production line. Thus, your budget will flow into investments, that enhances your force in an increasingly competitive market.

Speed and quality are at the centre of our customer service.

We aim to provide both customized and packaged solutions, so our clients can always find a solution that fits their need, at the most efficient resources.

Where our clients come from

Our main clients are based in Japan, South East Asia and Northern Europe.

With young, dynamic, professional and well-trained workforce, we are confident to deliver the most suitable and efficient solutions to our clients.
